

# Plants NASA has grown in Space...

- red romaine lettuce
- Arabidopsis
- Bok Choy
- Sunflower
- Super dwarf wheat
- Ceratopteris richardii
- Apogee wheat
- Brassica rapa

27 foods!

- Rice
- Tulips
- Kalanchoe
- Flax

- Onions
- Peas
- Radishes

• lettuce

• wheat

• garlic

• Cucumbers

• Parsley

• Potato

• dill

• lettuce and Cinnamon basil

• Cabbage

• Zinnia hybrida

• Mizuna lettuce

# Plants that would be helpfull in space...

● Plants that Don't need so much sunlight =

- ★ Arizona Sun
- ★ Gracillimus
- ★ National tree
- ★ Aloe favor

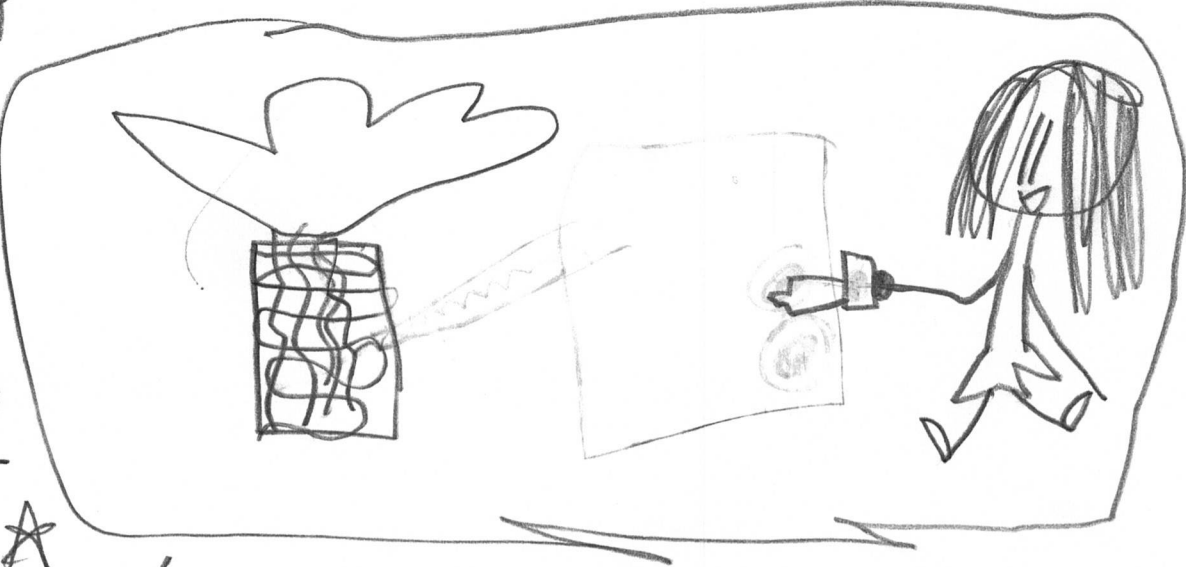

● Plants that Don't need so much watter =

- ★ Adenium
- ★ Vipers
- ★ large-flowered
- ★ Zamiovilas
- ★ Zanzibar Gem
- ★ Common Sage

● Plants that Don't need Soil =

- ★ lucky bamboo
- ★ orchids
- ★ marimo
- ★ Aechmea
- ★ Philodendron
- ★ Tillandsia
- ★ bunch-flowered daffodil
- ★ Spanish moss

# My Plan

You can use burlap around the soil and roots. then, you could use a syringe, fill it up with water, and use the syringe to get water into the soil.
